

For students related to Veterinary Medicine,
Animal Science and Animal Husbandry

**BLENDED INTENSIVE
PROGRAMME**

DETECTIVE WORK: HOW TO PREPARE FOR VETERINARY PRACTICE

May 2025, Kaunas

Unlock the Secrets of Infectious Diseases in Animals and Beyond!

Explore the challenges posed by infectious diseases in animals and their impact on health and welfare. Learn how to identify, prevent, manage clinical situations and outbreaks, from parasitic infections to viral epidemics. Gain practical skills to tackle complex cases and protect both animal populations and your professional practice — **enroll today!**

The course is limited to 20 participants

Lithuanian University of Health Sciences, Veterinary Academy

WHAT WILL YOU LEARN?

- Management of Clinical Cases and Biosecurity
- Parasitic and Respiratory Diseases in Companion Animals
- Gastrointestinal Health and Anthelmintic Resistance in Ruminants
- Infectious Disease Management in Zoos and Wildlife Centers
- Advanced Diagnostic Techniques in Veterinary Medicine

Volume of the BIP – 3 ECTS

Workshops
and lab
works

Trips to the Zoo
and Wildlife
Rescue Centre

based
Escape room

TEACHERS

prof. Arvo Viltrop

Estonian University of Life Sciences

Work field: epidemiology, zoonosis,
verinary public health

assist. prof. Marcin Mickiewicz

Warsaw University of Life Sciences

Work field: parasitic diseases,
anthelmintic resistance

prof. Jarosław Kaba
Dipl. ECSRHM

Warsaw University of Life Sciences

Work field: veterinary
epidemiology, infectious diseases

prof. Alvydas Malakauskas

State Food and Veterinary Service

Work field: disease surveillance,
control and outbreak investigations

assoc. prof. Tomas Kupčinskas

**Lithuanian University of Health
Sciences**

Work field: infectious diseases,
parasitology

dr. Jurgita Autukaitė

Lithuanian Zoological Gardens

Work field: camelids, small
ruminants, wild animals

dr. Inga Stadalienė

**Lithuanian University of Health
Sciences**

Work field: internal diseases,
infectious diseases

assoc. prof. Dainius Zienius

**Lithuanian University of Health
Sciences**

Work field: infectious diseases,
virology

dr. Raimundas Lelešius

**Lithuanian University of Health
Sciences**

Work field: infectious diseases,
microbiology

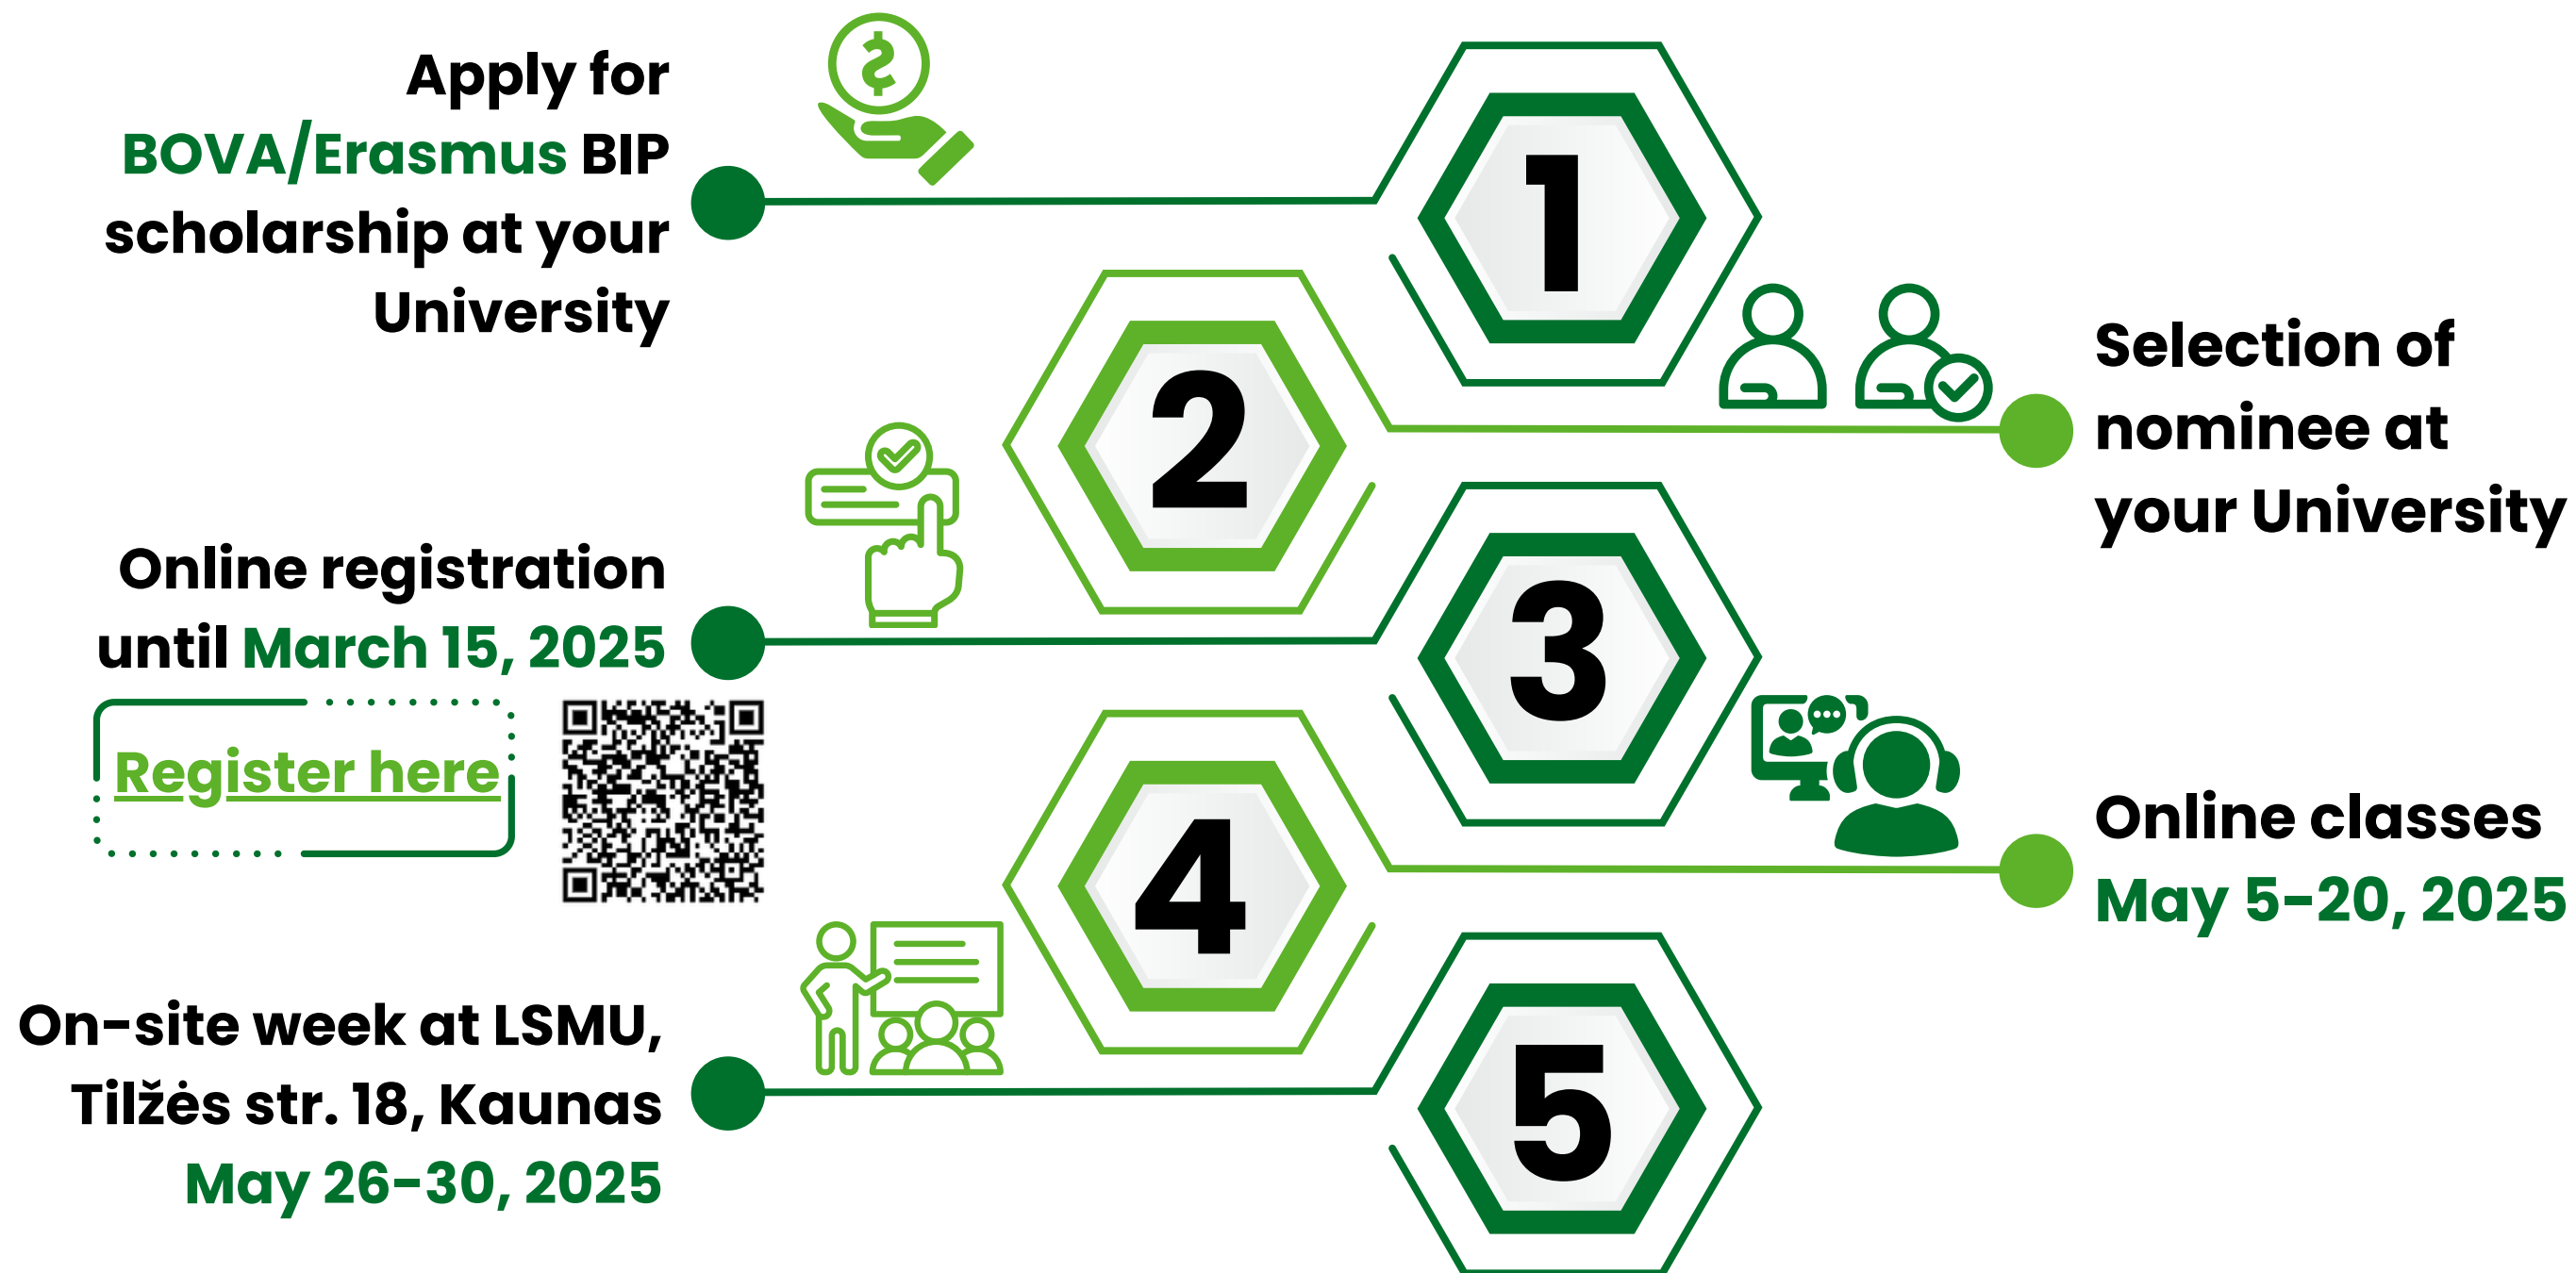

vet. Morgana Laura Fiorini

The LSMU Wildlife Rescue Centre

Work field: wild animals

ROADMAP OF THE BIP

COURSE FEE

The training is free of charge

REQUIRED KNOWLEDGE

Participants should have basic understanding of biology, microbiology, virology, parasitology and veterinary science principle
